

RAUSHAN KUMAR MANJHI

Senior .NET Full Stack Developer | ASP.NET Core | Angular | SQL Server | Azure | AI

+91-8825164575 | 2505raushan@gmail.com | LinkedIn: www.linkedin.com/in/raushan-kumar-2422b7237

Open to: Gurgaon | Noida | Mumbai | Pune | Hyderabad | Bengaluru

PROFESSIONAL SUMMARY

Full Stack .NET Developer with 5+ years of experience building **scalable, high-performance enterprise applications** using ASP.NET Core, Angular, and Azure. Strong expertise in **REST APIs, SQL Server, CI/CD, and modern architecture**, with a proven ability to deliver reliable solutions, optimize performance, and drive projects from **system design to production** in Agile environments.

CORE COMPETENCIES

Enterprise Application Development • Full-Stack Application Development • ETL & Large-Scale Data Processing • System Design & Architecture • Database Design & Optimization • System Integration • Production Support & Troubleshooting • Performance Engineering • Code Review & Refactoring • Technical Problem Solving • Agile/Scrum Delivery • Cross-Functional Collaboration

TECHNICAL SKILLS

Backend: ASP.NET Core, ASP.NET MVC, C#, REST APIs, Entity Framework Core, LINQ, JWT Authentication, Role-Based Authorization, Design Patterns, SOLID Principles, Dependency Injection, Async/Await, Multithreading

Frontend: Angular 16+, RxJS, Reactive Forms, Lazy Loading

Database: SQL Server, Stored Procedures, Views, Functions, Triggers, Query Optimization, Code First Migrations

Cloud & DevOps: Azure, Docker, Kubernetes, Jenkins, GitLab CI/CD, Git, GitHub

Testing & Tools: xUnit, NUnit, Postman, Swagger/OpenAPI

AI Tools: ChatGPT, GitHub Copilot, AI-Assisted Development, Prompt Engineering

PROFESSIONAL EXPERIENCE

Interra information Technology -- Senior.NET Full Stack Developer 09th Feb 2026 – Present) | Hybrid

Project: StarScape

- Engineered and maintained scalable REST APIs using ASP.NET Core and C# to power Planning, Execution, Monitoring, and Billing modules of a cross-media advertising platform spanning Cinema, TV, Radio, and Digital channels.
- Developed responsive, modular front-end features in Angular using RxJS, Reactive Forms, and Lazy Loading, improving page load performance and reducing initial bundle size.
- Designed and optimized Entity Framework Core data models and LINQ queries against SQL Server 2019, cutting average response time on high-volume billing reports.
- Collaborated within a large, cross-functional Agile team through sprint planning, code reviews, and daily stand-ups to consistently deliver features on schedule.
- Supported deployment and monitoring of application services on Microsoft Azure, contributing to smoother, more predictable release cycles.
- Applied SOLID principles and established design patterns to refactor legacy modules, improving maintainability and reducing recurring defects.
- Adopted GitHub Copilot and ChatGPT for AI-assisted development, accelerating boilerplate coding, code reviews, and unit test creation.

Publicis Resources -- .NET Full Stack Developer

(Contract via Career Net Technologies: 26th Oct 2023 – 28th Apr 2025 | Full-Time: 29th Apr 2025 – 29th Jan 2026) | Hybrid

Project: Kipling

- Contributed to an **enterprise-scale application for VF Corporation's Kipling brand**, supporting scalable business and data solutions.
- Developed **RESTful APIs and backend services** using **ASP.NET Core, C#, Web API, Entity Framework Core, and SQL Server**.
- Designed **ETL workflows** to extract, validate, transform, and load large volumes of business data into SQL Server.
- Built a **high-performance .NET data import utility** to process **millions of Excel records** with optimized bulk loading, validation, and error handling.
- Optimized **SQL queries, stored procedures, and database operations** to improve application and data-processing performance.
- Delivered new features, resolved **production issues**, supported deployments across **Development and Production**, and collaborated with **cross-functional Agile teams**.

Mycom – OSI Pvt. Ltd -- .NET Developer May 2022 – Sept 2023) | Hybrid

Project: Net-Expert Alert Manager

- Built and maintained NetExpert Alert Manager, a browser-based alert monitoring system using ASP.NET MVC Core, Angular, and SQL Server, eliminating the need for additional client-side software.
- Implemented authorization-based access controls, ensuring users could view and manage alerts only for systems they were explicitly authorized to access.
- Designed and optimized SQL Server stored procedures and views to support real-time alert querying and reporting across distributed systems.
- Integrated Angular-based dashboards with backend REST APIs to surface live system alerts with minimal latency.
- Refactored legacy MVC modules to improve readability and align with SOLID design principles, reducing future maintenance effort.

Quest IT Pvt. Ltd. Junior. NET Developer – OSI Pvt. Ltd -- .NET Developer May 2021 – May 2022) | Hybrid

Project: Labguru-2020

- Developed key modules Production, Aligner, Reports, and Design Centre — for Labguru-2020, a healthcare platform supporting clear-aligner purchases, using ASP.NET MVC Core, Angular, and Entity Framework.
- Built reporting features using SQL Server queries and stored procedures, giving healthcare professionals real-time visibility into production and order status.
- Implemented client-side validation and Angular Reactive Forms to improve data accuracy during patient order intake.
- Contributed to unit testing using xUnit/NUnit to maintain code quality and reduce regressions across releases.
- Collaborated with a 15-member cross-functional team spanning design, QA, and product to deliver features on schedule.

EDUCATION

Bachelor's Degree (B.E.) in Computer Science / Information Technology

Shivaji University-2021 (70 %)
